Los Angeles, CA | (714) 443-1770 | harshaunkhehra@yahoo.com | [Github](#) | [LinkedIn](#) | US Citizen

Professional Summary

Innovative software engineer with a strong track record in software development, full-stack engineering, and scalable SaaS architecture. Skilled in coding, testing, troubleshooting, debugging, and maintaining software solutions across diverse software systems. Experienced in AI/ML integration, system design, version control systems (Git), and Agile development methodologies. Proven ability to collaborate on team-based projects, follow software development lifecycle, and deliver measurable results while applying strong analytical skills, attention to detail, and continual learning. Holds a Bachelor's degree in Computer Science and is pursuing a Master's to advance expertise in Software Engineering and enterprise innovation.

Education

University of California, Irvine

Sept 2025 – Present

Master of Computer Science

California State University, Los Angeles

Graduated: May 2025

Bachelor of Science, Computer Science

GPA: 3.9

Professional Experience

Software Engineer Intern – Verdant Development, Redwood City, CA

May 2025 – Sept 2025

Next.js, React.js, Supabase, VAPI, JavaScript, HTML, Tailwind CSS

- Reduced interview **preparation time by 80%** and achieved **99% uptime** with sub-2-second response times for **10,000+ users** by engineering a full-stack AI interview platform **integrating OpenAI GPT-4, Vapi AI voice technology**, and a **Supabase backend**.
- Improved recruiter efficiency by enabling fully customizable interviews in **under 3 minutes** by building and scaling a SaaS interview management system that processes **500+ AI-generated questions daily** via **real-time transcription (Deepgram)**, **voice synthesis (PlayHT)**, and **PayPal billing**.
- Maintained system quality and team collaboration across the full development lifecycle by applying **Agile methodologies**, **Git-based version control**, and **modular component architecture** throughout the project.

Software Engineer Intern – Leidos QTC Health Services, Los Angeles, CA

August 2024 – May 2025

Python, Pytorch, ASP.NET Core, Angular, Azure

- Developed an AI/ML-powered Quality Management System using **PyTorch**, **Python**, and **ASP.NET Core** to analyze survey responses, generate KPI data, and visualize trends on a dashboard, enabling data-driven improvements in service quality.

Project Committee Lead - Los Angeles, CA

January 2024 – June 2024

Python, Pygame

- Boosted participants' coding **proficiency by 60%** and increased project **completion rates by 35%** by leading a 10-member team to design and build a 2D platform game in Python and Pygame, providing mentorship, debugging support, and collaborative workshops throughout the development cycle.

Technical Skills

Programming Languages: Java, Python, C, C#, Swift, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: PyTorch, TensorFlow, Spring Boot, Django, React.js, Next.js, Bootstrap, Tailwind, Tableau

Tools & Technologies: Agile, GitHub, JIRA, Machine Learning, Azure, Linux, MySQL, MongoDB, Supabase

Projects

SurveyOps+ LLM Assisted Insurance and Survey Automation

February 2025 – Present

React Native, Typescript, Python, Tailwind CSS, LangGraph, Docker, SQLite

- Enabled reliable **offline-first field data** capture across iOS and Android by building a **cross-platform Expo Router app** and **FastAPI backend** with a **Drizzle + SQLite local schema** and versioned REST API.
- Replaced manual, error-prone report writing with modular, **HTTP-callable LLM pipelines** by designing **LangGraph state machines** to orchestrate **multimodal Gemini flows** for photo tag extraction and template-driven report generation.
- Reduced environment inconsistency and regression risk across the team by integrating **Dropbox OAuth for cloud asset handoff**, containerizing services with Docker Compose, and writing pytest integration tests for critical API routes.

Full Stack Billing System

May 2025 – September 2025

Java, SpringBoot, React.js, JavaScript, AWS, HTML, CSS

- Built a **secure, role-based billing system** using **Java Spring Boot** and **JWT authentication**, enabling differentiated access for 3 user types (admin, employee, customer), and supporting seamless management of over **500+ users, products, and categories**.
- Integrated PayPal Checkout with dynamic tax calculation**, reducing manual payment processing time by **90%** and enabling users to complete transactions in under **10 seconds** through an automated cart and billing system.
- Configured Amazon S3 for scalable product image storage** and **developed 15+ RESTful APIs** to manage users, transactions, and categories, resulting in a **40% improvement in load performance** and streamlined backend operations.

Full Stack Book Store Website

Jan 2024 – May 2024

Python, Django, HTML, CSS, Bootstrap

- Led** end-to-end delivery of a **dynamic bookstore platform** for a team of six by acting as **Scrum leader**, setting weekly deadlines, running standups, and coordinating feature ownership across the group.
- Enabled core user-facing features — book posting, favorites, search, reviews, ratings, and a message board — by building a **Django backend** with session-based authentication and a Bootstrap frontend for responsive page rendering.
- Ensured **real-time UI updates** and smooth user interactions by implementing Django's view-template pipeline and managing **iterative sprints** to keep frontend and backend development in sync throughout the project.
